
Table of Contents

1.	Introduction	1
2.	QA Status of Work.....	2
3.	Problem Definition.....	4
3.1	Single Heater Test Configuration.....	4
3.2	Conceptual Model.....	5
3.3	Input Parameters	8
4.	Three-Dimensional Thermal Hydrological Simulation.....	14
4.1	Grid Design, Boundary and Initial Conditions.....	15
4.2	Simulation Results for Base Cases	16
4.3	Sensitivity to Fracture Continuum Conceptualization.....	19
4.4	Sensitivity to Initial Saturation.....	19
5.	Air Injection Tests in Hydrology Holes 16 and 18.....	21
5.1	Grid Design, Boundary and Initial Conditions.....	22
5.2	Air Injection Test Results for the Base Case.....	23
5.3	Sensitivity to Fracture Continuum Conceptualization.....	25
5.4	Sensitivity to Initial Saturation.....	26
5.5	Sensitivity to Gas Relative Permeability Formulation	26
5.6	Summary	26
6.	Sensitivity Study for Thermal-Hydrological Conditions	28
6.1	Base Case Results	29
6.2	Alcove Boundary Conditions	29
6.3	Enhanced Vapor Diffusion	30
6.4	Dual Permeability	30
6.5	Fracture Permeability	32
6.6	Matrix Permeability	32
7.	Summary	33
	Acknowledgment	34
	References	34
	Figures	A-1
